

FACT SHEET

UNITED STATES AIR FORCE

TECH CONNECT Finding Technology Answers

The Technology Connections Team (TECH CONNECT) was opened in the Air Force Technology Transition Office (TTO) in June of 1993. TECHCONNECT serves as a gateway for providing Air Force technology information to DoD, industry, and academia. With emphasis on connecting customers with an Air Force expert, TECHCONNECT can:

- Find more information regarding a particular technology;
- Search for helpful Air Force technologies;
- Contact Air Force technology experts; and
- Accelerate the transition of technology.

Although established to serve the Air Force, TECHCONNECT also:

- Fields requests from other government agencies trying to make the right Air Force technology connections, and
- Helps the commercial sector learn about potential technology transfer opportunities.

Located at Wright-Patterson Air Force Base, the TTO supports Air Force Materiel Command's (AFMC) science and technology mission as the

Air Force focal point for technology transition activities. In addition to facilitating the use of integrated Technology Application/Insertion programs, the TTO serves as the Technology Information Broker for the Air Force and the AFMC Coordinator for the Air Force Technology Transfer program. The single point of entry for information into the TTO on these activities and other Air Force technologies is TECH CONNECT.

To place a request, or for more information about the Technology Transition Office's (TTO) Technology Connections Team, please contact:
